Source code should be indented consistently		Code Smell
Tabulation characters should not be used		Code Smell

Track uses of disallowed dependencies

Analyze your code

-  Code Smell
-  Major ?
-  maven

Whether they are disallowed locally for security, license, or dependability reasons, forbidden dependencies should not be used.

This rule raises an issue when the group or artifact id of a direct dependency matches the configured forbidden dependency pattern.

Noncompliant Code Example

With a parameter of: *:.*log4j.*

```
<dependency> <!-- Noncompliant -->
  <groupId>log4j</groupId>
  <artifactId>log4j</artifactId>
  <version>1.2.17</version>
</dependency>
```
